Reducing Over Procurement – How?

- Know how many of everything you have, and where it is
- Know the service cycles and maintenance status – help rotate inventory
- Know equipment is being utilised and in the right place

The Sustainability Impact of Reducing Over Procurement

Reduction in acquiring raw materials

Reduction in manufacturing processes

Reduction in transport costs

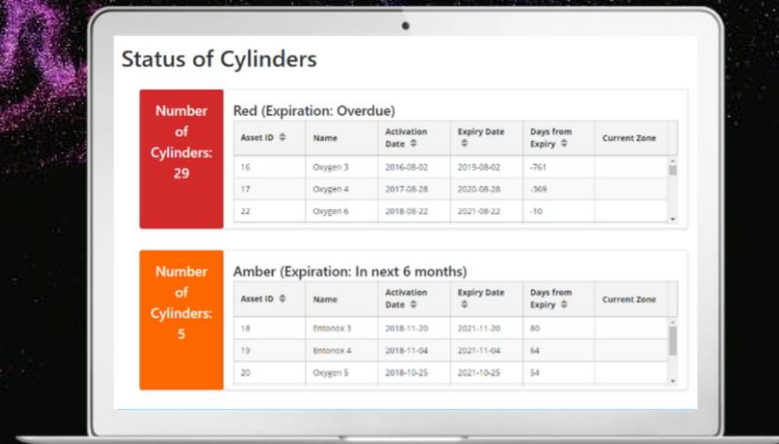

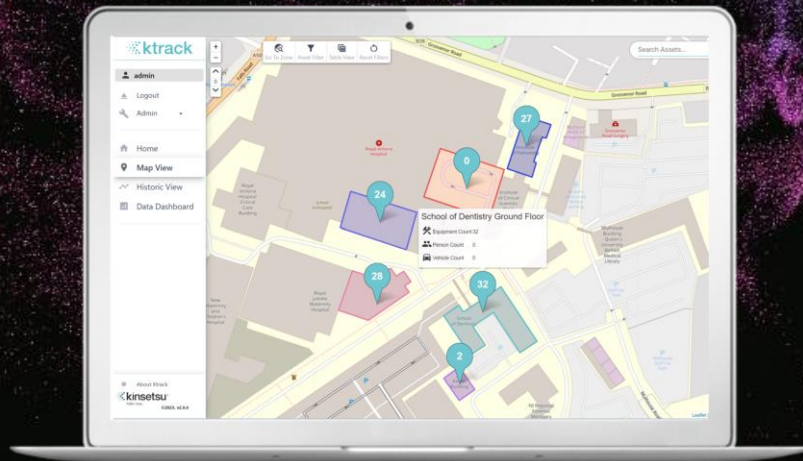

Reduction in warehousing costs

A Solution – Intelligent Asset Management

Instant asset location visibility and asset count – in hospital in and community

Integration with Asset Management solutions – now you know where anything is, at the touch of a button.

“The journey of a thousand miles begins with a single step”

Chinese Proverb
